

Team Assignment #2: User Stories

Section A5 Team 5

Drew Abram, Saroj Bhatta, David Li, Andrew Spencer, Phumin Walaipatchara

Primary User Stories:

Log-In Story: User will be greeted with a page that asks you to either click a button “Login with Spotify” to log in to the web app or enter their email and password if they are an existing user. They are then redirected to the spotify login form. This login will be using Single Sign-On (SSO). If the login is successful, they will then be redirected to the home-page of the website.

Spotify - Youtube Conversion Story: As a log-in user, he/she is shown a list of playlists drawn from their spotify account. User can select which playlist to be converted. The selected playlists will be converted into YouTube video links. User can choose to save the result in local computer. If a video is not found for a song, the user will see an error message as part of their list of videos which reads “Could not find a video for this playlist item”

Returning User Story: User will be greeted with a page that asks you to either click a button “Login with Spotify” to log in to the web app or enter their email and password if they are an existing user. User would choose to enter their email and password since they are a returning user. If the credentials match an existing user they will be directed to the home page, if not they will be told that there is no match and asked to try again.

User Interface: The user will be brought to an interface that will clearly display his or her different options for conversion and an option to log out of the web application. User will be able to view a history of what playlists were converted.

Secondary User Stories:

(Optional) **Recommendation Story:** User can choose to get recommendation as YouTube links/playlists based on the playlists from Spotify.

Selecting different version (MV/Lyrics): User can select a choice of MV video or lyrics video.

Choosing starting Point: User will be able to review videos and select a starting point, in order to account for videos which, for example, may have a long introduction with no music.

Save to youtube account: User can choose to create a YouTube playlist, which requires user to log in with Google account. When the user logs into their youtube account, they can choose to save playlists they have generated to their youtube account to reference later.

Save to Computer (definitely legal option): The user can select “save to computer”, which will download a list of URLs into a text file
